Safe Harbor Statement

Cautionary Statement Regarding Risks and Uncertainties That May Affect Future Results

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 about the business, financial condition and prospects of Enova. These forward-looking statements give current expectations or forecasts of future events and reflect the views and assumptions of Enova's senior management with respect to the business, financial condition and prospects of Enova as of the date of this release and are not guarantees of future performance. The actual results of Enova could differ materially from those indicated by such forward-looking statements because of various risks and uncertainties applicable to Enova's business, including, without limitation, those risks and uncertainties indicated in Enova's filings with the Securities and Exchange Commission ("SEC"), including our annual report on Form 10-K, quarterly reports on Forms 10-Q and current reports on Forms 8-K. These risks and uncertainties are beyond the ability of Enova to control, and, in many cases, Enova cannot predict all of the risks and uncertainties that could cause its actual results to differ materially from those indicated by the forward-looking statements. When used in this release, the words "believes," "estimates," "plans," "expects," "anticipates" and similar expressions or variations as they relate to Enova or its management are intended to identify forward-looking statements. Enova cautions you not to put undue reliance on these statements. Enova disclaims any intention or obligation to update or revise any forward-looking statements after the date of this release.

Non-GAAP Financial Information

In addition to the financial information prepared in conformity with generally accepted accounting principles in the United States (“GAAP”), Enova provides cash flow from operating activities less net loan and finance receivables originated, acquired and repaid and purchases of property and equipment (“free cash flow”) and net income excluding depreciation, amortization, interest, foreign currency transaction gains or losses, taxes, and stock-based compensation expense (“Adjusted EBITDA”), which are not considered measures of financial performance under GAAP. Management uses these non-GAAP financial measures for internal managerial purposes and believes that their presentation is meaningful and useful in understanding the activities and business metrics of Enova’s operations. Management believes that these non-GAAP financial measures reflect an additional way of viewing aspects of Enova’s business that, when viewed with Enova’s GAAP results, provides a more complete understanding of factors and trends affecting Enova’s business.

Management provides such non-GAAP financial information for informational purposes and to enhance understanding of Enova’s GAAP consolidated financial statements. Readers should consider the information in addition to, but not instead of, Enova’s financial statements prepared in accordance with GAAP. This non-GAAP financial information may be determined or calculated differently by other companies, limiting the usefulness of those measures for comparative purposes. A table reconciling such non-GAAP financial measures is available in the appendix.

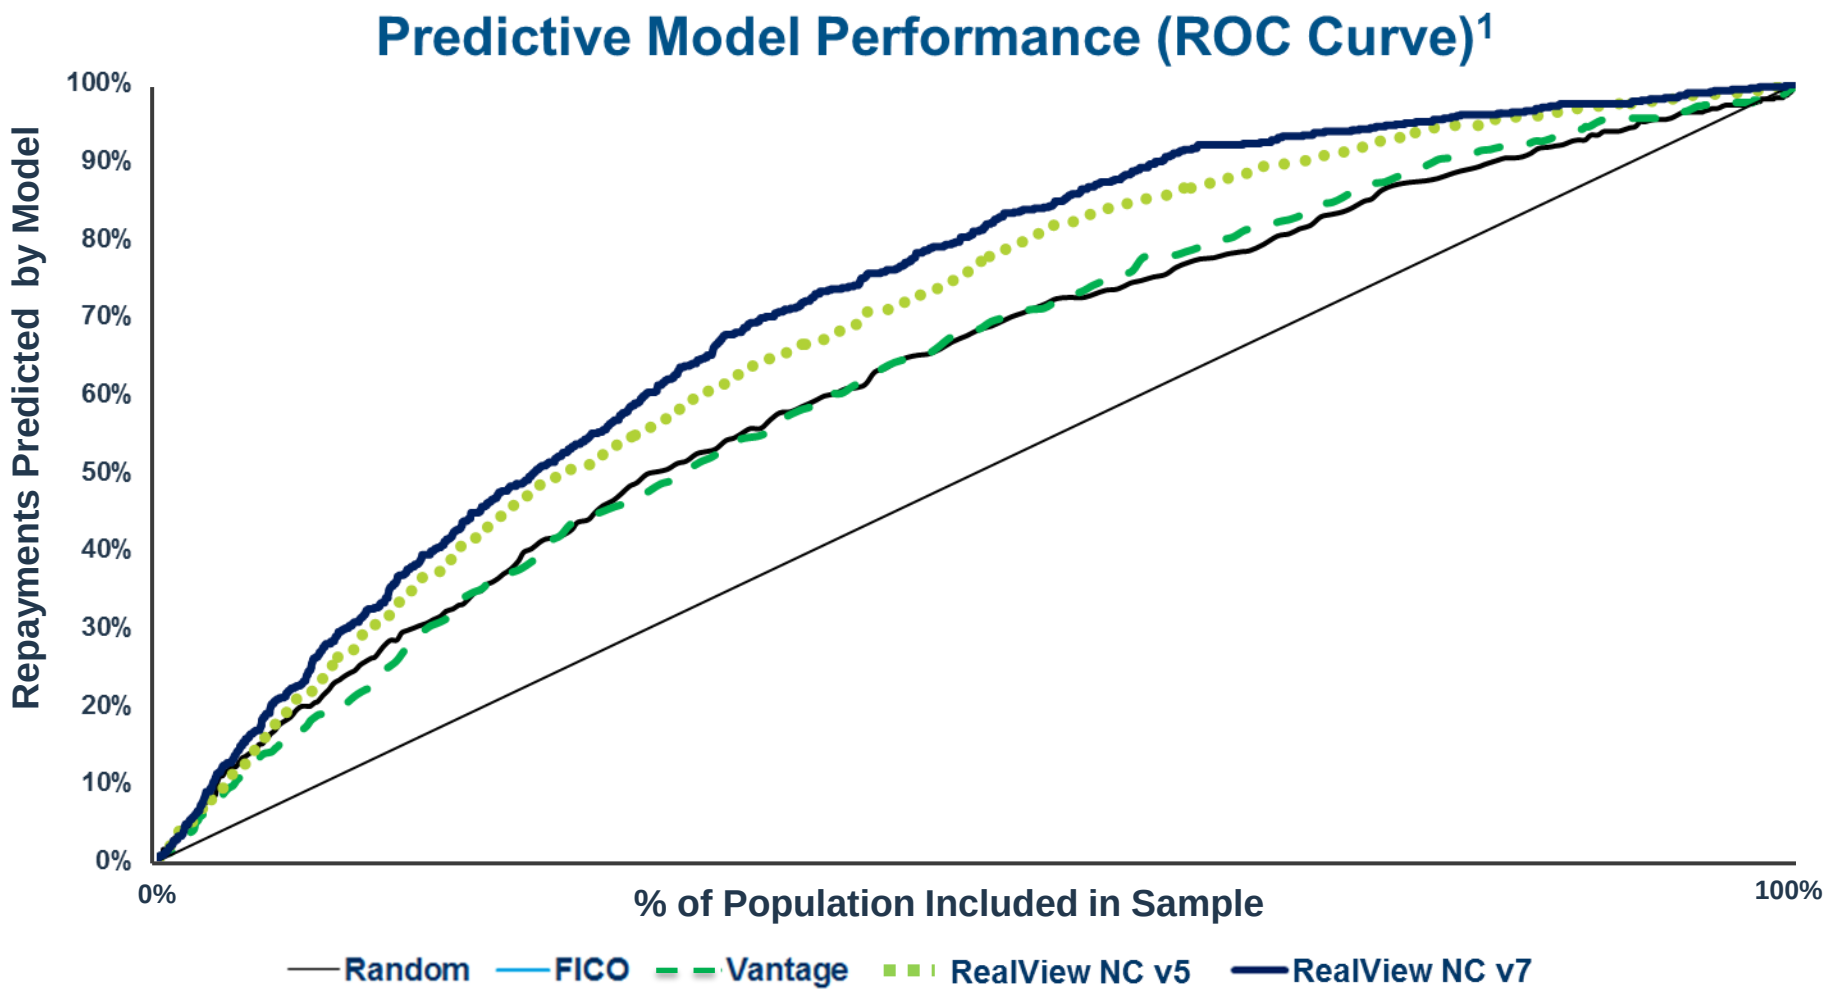
Enova's RealView™ Underwriting Outperforms Competitors



[1] *ROC Curves - Receiver Operating Characteristic Curves (True Positives versus False Positives at __ levels). This graph should not be considered to be an indicator of future performance. Depiction of Enova study using a random sample from its NetCredit applicant pool (the "population"). As one moves up the Y axis and along the X axis, more of the population is included. The population is ordered by perceived creditworthiness so that at the bottom left of the graph, only the most creditworthy customers are included in the population. At the top right, 100% of the population is included, with the least creditworthy parts of this population being the last included.*

CFPB Small Dollar Lending Rule Implementation Overview

Notice of Proposed Rulemaking on June 2, 2016

- Proposed rule generally consistent with March 2015 Outline of Proposals
- Proposal includes: (1) Ability to Repay underwriting or alternative products; (2) Restrictions on consumer borrowing; (3) Repayment method limitations; and (4) Reporting requirements
- Flexible online platform, history of compliant operations, and successful experience with UK regulatory changes will enable rapid adaption of products to new rules
- Enova estimates that rule as proposed would affect products that currently generate 60-65% of total revenue and revenue for those products could decline by 30-40% from today's levels
- Growth from Enova's new initiatives as well as any changes in the competitive landscape could minimize the eventual impact of the rule

Estimated timeline:

June - Oct '16		Mar '17 - July '17		Mid to Late '18	
Proposed Rule Published	Comment Period (~ 90 days)	Response Period (6 – 9 months after comments)	**Final Rule Published**	Implementation Period (60 days for reporting, 15 months for lending rules)	**Effective Date**

Proactive, Global Compliance Capabilities

Compliance Infrastructure

- Licensed where required; reduces regulatory risk and is a barrier to entry
- Central team led by professional bank compliance officer reporting to Board of Directors
- Regulatory framework built into technology platform and the business model
- Rapidly update products and business rules for changes in regulatory requirements and laws

Regulatory Environment

National and 50 States

Primary Federal regulator, CFPB announced proposed rules 6/2; final rules likely effective mid-2018

State regulations generally stable, subject to political process of state legislatures

State and Federal focus on unlicensed lenders – potential long-term positive impact

National

Primary National regulator, FCA (as of 4/1/14) issued new rules under the Consumer Credit Sourcebook in early 2014

Total Cost of Credit cap effective 1/2/15

All UK products granted full authorization by FCA in January 2016

National

Brazil – National regulator

Regulatory matters are coordinated with our Brazilian-based banking partner
